* Estimated by Illinois State Geological Survey.

** Estimated by Illinois State Geological Survey from Oil and Gas Journal Report.

1/ Production figures based on Illinois Basin Scout Association's Pipe Line Production Report.

2/ Includes Devonian production at Sandoval and Bartelso.

3/ From the U. S. Bureau of Mines, through 1950.

o Includes only oil and gas producers and dry holes.

a/ Figures in parentheses refer to number of producing wells included in total which had previously been completed as dry holes.

ECONOMIC STATEMENT
Mineral Economics Section

Crude oil from Illinois is marketed in substantial quantities in both the Central Refining District and in the western part of the Appalachian Refining District (District #2). The table shows the ratio of production in Illinois to runs-to-stills and includes both the Central Refining District and District No. 2 of the Appalachian Refining District.

* Estimated by Illinois State Geological Survey.

** Estimated by Illinois State Geological Survey from Oil and Gas Journal Report.

1/ Production figures based on Illinois Basin Scout Association's Pipe Line Production Report.

2/ Includes Devonian production at Sandoval and Bartelso.

3/ From the U. S. Bureau of Mines, through 1950.

o Includes only oil and gas producers and dry holes.

a/ Figures in parentheses refer to number of producing wells included in total which had previously been completed as dry holes.

ECONOMIC STATEMENT
Mineral Economics Section

Crude oil from Illinois is marketed in substantial quantities in both the Central Refining District and in the western part of the Appalachian Refining District (District #2). The table shows the ratio of production in Illinois to runs-to-stills and includes both the Central Refining District and District No. 2 of the Appalachian Refining District.

(Concluded on page 3)

1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the study and the objectives of the research.

2. The second part of the report is a detailed description of the methodology used in the study. It includes information about the sample size, the data collection methods, and the statistical analysis techniques.

3. The third part of the report is a discussion of the results of the study. It presents the findings of the research and discusses their implications for the field of study.

4. The fourth part of the report is a conclusion and a list of references. The conclusion summarizes the main findings of the study, and the references list the sources of information used in the research.

5. The fifth part of the report is a list of appendices. These appendices contain additional information that is relevant to the study but is not included in the main body of the report.

6. The sixth part of the report is a list of figures and tables. These figures and tables provide a visual representation of the data and results of the study.

Table 1: Summary of the main findings of the study.	
Findings	Implications
1. The study found that the majority of the sample was composed of individuals who were between the ages of 18 and 30.	This finding suggests that the study is most relevant to the younger population.
2. The study found that the majority of the sample was composed of individuals who were employed full-time.	This finding suggests that the study is most relevant to the working population.
3. The study found that the majority of the sample was composed of individuals who were of the majority ethnic group.	This finding suggests that the study is most relevant to the majority ethnic group.
4. The study found that the majority of the sample was composed of individuals who were of the majority gender.	This finding suggests that the study is most relevant to the majority gender.
5. The study found that the majority of the sample was composed of individuals who were of the majority religion.	This finding suggests that the study is most relevant to the majority religion.
6. The study found that the majority of the sample was composed of individuals who were of the majority language.	This finding suggests that the study is most relevant to the majority language.
7. The study found that the majority of the sample was composed of individuals who were of the majority culture.	This finding suggests that the study is most relevant to the majority culture.
8. The study found that the majority of the sample was composed of individuals who were of the majority social class.	This finding suggests that the study is most relevant to the majority social class.
9. The study found that the majority of the sample was composed of individuals who were of the majority political affiliation.	This finding suggests that the study is most relevant to the majority political affiliation.
10. The study found that the majority of the sample was composed of individuals who were of the majority sexual orientation.	This finding suggests that the study is most relevant to the majority sexual orientation.

** Estimated by Illinois State Geological Survey from Oil and Gas Journal Report.

1/ Production figures based on Illinois Basin Scout Association's Pipe Line Production Report.

2/ Includes Devonian production at Sandoval and Bartelso.

3/ From the U. S. Bureau of Mines, through 1950.

o Includes only oil and gas producers and dry holes.

a/ Figures in parentheses refer to number of producing wells included in totals which had previously been completed as dry holes.

ECONOMIC STATEMENT
Mineral Economics Section

Crude oil from Illinois is marketed in substantial quantities in both the Central Refining District and in the western part of the Appalachian Refining District (District #2). The table shows the ratio of production in Illinois to runs-to-stills and includes both the Central Refining District and District No. 2 of the Appalachian Refining District.

1/ Production figures based on Illinois Basin Scout Association's Pipe Line Production Report.

2/ Includes Devonian production at Sandoval and Bartelso.

3/ From the U. S. Bureau of Mines, through 1950.

o Includes only oil and gas producers and dry holes.

a/ Figures in parentheses refer to number of producing wells included in totals which had previously been completed as dry holes.

ECONOMIC STATEMENT
Mineral Economics Section

Crude oil from Illinois is marketed in substantial quantities in both the Central Refining District and in the western part of the Appalachian Refining District (District #2). The table shows the ratio of production in Illinois to runs-to-stills and includes both the Central Refining District and District No. 2 of the Appalachian Refining District.

** Estimated by Illinois State Geological Survey from Oil and Gas Journal Report.

^{1/} Production figures based on Illinois Basin Scout Association's Pipe Line Production Report.

^{2/} Includes Devonian production at Sandoval and Bartelso.

^{3/} From the U. S. Bureau of Mines, through 1950.

^o Includes only oil and gas producers and dry holes.

^{a/} Figures in parentheses refer to number of producing wells included in totals which had previously been completed as dry holes.

ECONOMIC STATEMENT
Mineral Economics Section

Crude oil from Illinois is marketed in substantial quantities in both the Central Refining District and in the western part of the Appalachian Refining District (District #2). The table shows the ratio of production in Illinois to runs-to-stills and includes both the Central Refining District and District No. 2 of the Appalachian Refining District.

** Estimated by Illinois State Geological Survey from Oil and Gas Journal Report.

1/ Production figures based on Illinois Basin Scout Association's Pipe Line Production Report.

2/ Includes Devonian production at Sandoval and Bartelso.

3/ From the U. S. Bureau of Mines, through 1950.

o Includes only oil and gas producers and dry holes.

a/ Figures in parentheses refer to number of producing wells included in totals which had previously been completed as dry holes.

ECONOMIC STATEMENTMineral Economics Section

Crude oil from Illinois is marketed in substantial quantities in both the Central Refining District and in the western part of the Appalachian Refining District (District #2). The table shows the ratio of production in Illinois to runs-to-stills and includes both the Central Refining District and District No. 2 of the Appalachian Refining District.

* Estimated by Illinois State Geological Survey.

** Estimated by Illinois State Geological Survey from Oil and Gas Journal Report.

1/ Production figures based on Illinois Basin Scout Association's Pipe Line Production Report.

2/ Includes Devonian production at Sandoval and Bartelso.

3/ From the U. S. Bureau of Mines, through 1950.

o Includes only oil and gas producers and dry holes.

a/ Figures in parentheses refer to number of producing wells included in totals which had previously been completed as dry holes.

ECONOMIC STATEMENT
Mineral Economics Section

Crude oil from Illinois is marketed in substantial quantities in both the Central Refining District and in the western part of the Appalachian Refining District (District #2). The table shows the ratio of production in Illinois to runs-to-stills and includes both the Central Refining District and District No. 2 of the Appalachian Refining District.

** Estimated by Illinois State Geological Survey from Oil and Gas Journal Report.

1/ Production figures based on Illinois Basin Scout Association's Pipe Line Production Report.

2/ Includes Devonian production at Sandoval and Bartelso.

3/ From the U. S. Bureau of Mines, through 1950.

o Includes only oil and gas producers and dry holes.

a/ Figures in parentheses refer to number of producing wells included in totals which had previously been completed as dry holes.

ECONOMIC STATEMENTMineral Economics Section

Crude oil from Illinois is marketed in substantial quantities in both the Central Refining District and in the western part of the Appalachian Refining District (District #2). The table shows the ratio of production in Illinois to runs-to-stills and includes both the Central Refining District and District No. 2 of the Appalachian Refining District.

* Estimated by Illinois State Geological Survey.

** Estimated by Illinois State Geological Survey from Oil and Gas Journal Report.

1/ Production figures based on Illinois Basin Scout Association's Pipe Line Production Report.

2/ Includes Devonian production at Sandoval and Bartelso.

3/ From the U. S. Bureau of Mines, through 1950.

o Includes only oil and gas producers and dry holes.

a/ Figures in parentheses refer to number of producing wells included in totals which had previously been completed as dry holes.
